DETAILED ACTION

Applicants' arguments, filed 6/18/04 and 9/14/04, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claims 1-22, 24-36, and 46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The NEW MATTER rejection directed to the NEW MATTER of "randomly selected..." conditions is reiterated from the previous office action, mailed 6/10/04, and as necessitated by amendment regarding new added claim 46. In REMARKS, filed 6/18/04, applicant argues that paragraphs 29-32 and Table 4 provide written basis for said "random selected..." conditions. Consideration of said paragraphs 29-32 firstly has failed to reveal any random selection disclosure whatsoever. Consideration of Table 4 reveals that a point in a gradient is selected at random which fails to support either conditions (plural) selected at random as in instant claim 1 nor the random selection from a population as also cited in claim 1. Thus, the Table 4 random selection clearly

Art Unit: 1631

lacks any correspondence or written support for said NEW MATTER which is therefore still properly deemed NEW MATTER.

PRIOR ART

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 37 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eustace et al. [Chemical Innovation, 31(4): 31 (2001)].

This rejection is reiterated from the previous office action, mailed 6/10/04. In REMARKS, filed 6/18/04, applicant argues that the reference does not suggest how to apply the Six Sigma methodology to a myriad of other industrial settings, let alone the many aspects of combinatorial experiment program or for improving reagent delivery or a stock formulating step therein. In response, instant claims 37 and 43 lack any improvement limitations but rather only result in a calculation of defects per unit of reactant delivery or formulating step. Such defect calculating of reactant or incoming (formulating) material was pointed to in the reference and not argued by applicant. Also, the combining of incoming material of the reference is combinatorial since no distinguishing definition has been pointed to by applicant nor seen in the instant disclosure as filed. Therefore, applicant's argument is not directed to the basis of the rejection and therefore moot.

Art Unit: 1631

Claims 38-42, 44, and 45 are allowable.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
